Basic Fire Safety At Work

(3 hours)

Course Syllabus

- Fire Safety
- Introduction to Fires In The Workplace
- Areas of Fire Risk & Common Hazards
- Reducing Risks & Individual Responsibilities
- Chemistry of Fire & The Effects Of Fire & Smoke
- Fire Safety & Evacuation Procedures
- Assembly Points & Liaising With The Fire Services
- Human Behaviour
- Extinguishing Agents & Requirements
- Types & Use of Fire Extinguishers (Theory)
- Review & Quiz

Our Basic Fire Safety At Work course is designed for all members of staff and is particularly aimed for those that have recently joined the organisation or for team members who need a refresher on fire safety.

This interactive course is a 3 hour training session aimed at ensuring delegates have a sound knowledge of the dangers of fire, basic fire prevention and what to do in the event of a fire.

Learning Outcomes

By the end of the training session the delegates will be able to:

- State their responsibilities in regard to fire safety.
- Define the danger of fire and how fire can spread.
- Describe the threat to people and property.
- Explain relevant fire procedures and why they are implemented.
- Detail the action to take upon discovery of a fire.
- Describe the different types of fire extinguishers and the appropriate use.

Our Company

Active Fire Management was founded in 2001. Offering fire safety training and risk assessments to a customer base that over the years has exceeded 200 clients, the company has earned a reputation for its cost effective approach to quality assurance and excellent service standards.

Our team of customer focused instructors and risk assessors are highly experienced fire safety personnel with career backgrounds that include training, fire management and Local Authority Inspecting Officer roles.

Our reports are created to provide factual observations that help to manage risks and increase fire safety measures as necessary.
